I've created a bunch of templates using vuetify as a template framework, and have them all working nicely, but I'm having trouble getting the tabs to work. I have all the templates loaded via lazy-loading, and the vuetify tab component seems to only render one of the tabs by default. Here's a stripped down version of my vue-component: Tab 1 export default { name: 'Tab', } @import '~vuetify/src/styles/core/scss/vuetify'; @import '~vuetify/src/styles/vars/vuetify-tabs'; The result is that by default, the first tab will display. If you can't see my issue by looking at the screen-shot, the first thing to notice is that no other tabs are displayed, despite me adding in many different variants of tab-demos. A: Well, the problem appears to have been down to how the tabs were being dynamically added to 82157476af
